Isle of Wight County, Traffic Advisory

August 28, 2024

Please be advised that increased construction vehicle traffic will be present in Isle of Wight County during the construction of the Virginia Reliability Project (VRP).

VRP will replace approximately 49-miles of natural gas pipeline between Sussex County and Chesapeake in 2024 and 2025. VRP will enhance regional energy security, modernize existing energy infrastructure, and boost the local economy.

During construction neighbors may notice:

- Delivery of pipe and equipment, including increased truck traffic and crew presence.
- Noise from construction preparation activities.
- Other related activities along the pipeline corridors.
- Preparation and execution of Horizontal Directional Drill (HDD) activities near water and road crossings.

Traffic associated with VRP will be managed in compliance with VDOT and local traffic control plans and approved stipulations. Traffic associated with VRP is expected along the following roads in Isle of Wight County:

US 460/Windsor Boulevard	Five Forks Road	Peanut Drive
US 258/Courthouse Highway	Garrison Drive	Pope Swamp Trail
Beale Place Drive	Iron Mine Springs Road	Rattlesnake Trail
Broadwater Road	Jones Town Dr	Tar Road
Central Hill Road	Mill Swamp Road	Tomlin Hill Drive
Everets Road	Murphy Mill Road	Whispering Pines Trail
Fire Tower Road	Orbit Road	Yellow Hammer Road

Detailed construction updates will be provided on www.VirginiaReliability.com, where neighbors can sign up for email updates. A map showing the planned work for 2024 and 2025 is available to view.
